

# CASE STUDY: Gullwing Beach Resort

LOCATION: FORT MYERS, FL

## SITUATION:

The roof of the Gullwing Beach Resort had significant damage due to Hurricane Ian. The roof was torn open, leaving the facility open to the elements. Simon Roofing performed emergency repairs immediately following the hurricane to get the roof back to a watertight condition. This temporary repair allowed Gullwing the time necessary to secure approval on a new roof.

 Combined: 13,272 sq. ft.

 Emergency Repairs

 CLP Roof System

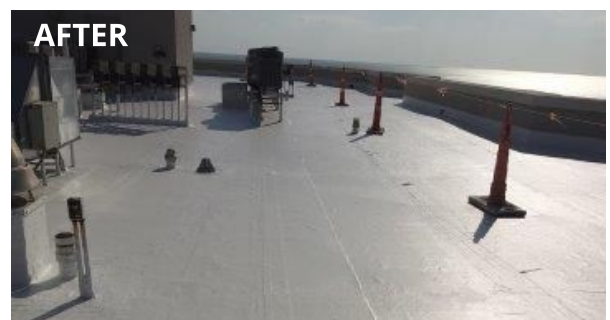

## SOLUTION:

Due to the substantial damage, the existing roof had to be completely torn off. Simon Roofing removed the temporary repairs, as well as the existing roof. From there, our CLP Roof System was installed, since it follows local building code and Factory Mutual standards to withstand wind uplift and more. This new system comes with a 20-year warranty, providing peace of mind and watertight protection to the Gullwing Beach Resort, its staff and guests.

## END RESULTS:

- Emergency, temporary repairs allowed customer 6 months to get replacement approval
- New CLP Roof System installed
- 20-year warranty covering labor and materials
- Watertight roof designed to protect against Florida weather hazards
